SUMMARY

Experienced **Software Engineer** with 4 years of expertise in building secure, scalable, and high-performance web applications. Proficient in ASP.NET Core and C#, specializing in RESTful API development, business logic implementation, and SQL Server integration using Entity Framework Core, LINQ, and async programming for building robust back-end systems.

Skilled in React with TypeScript, JavaScript, Redux and MUI for creating responsive, front-end interfaces integrated with back-end services. Focused on clean code, performance optimization, and Agile collaboration to deliver user-centric, high-quality solutions.

WORK EXPERIENCE

eCTD Global Solutions (a subsidiary of Masuu Global Solutions) **Jun 2022 - Present**

Software Engineer

- Optimized back-end services with .NET Core, C#, and SQL Server, enhancing system performance and efficiency through effective architecture.
- Designed RESTful APIs with clean business logic and Entity Framework Core, enhancing system performance and maintainability.
- Improved database and application efficiency by streamlining workflows and optimizing queries, boosting performance by 25%.
- Collaborated in Agile teams using Azure Boards for sprint planning, task tracking, and delivery coordination.
- Contributed to front-end development with React, TypeScript, and Redux-Saga, ensuring smooth integration and a responsive user experience.

PROJECTS

Industry Iceberg **Current Project**

- Designed and implemented a scalable, **micro-services-based** back-end **architecture**.
- Integrated **CCAvenue Payment Gateway** for secure and seamless payment processing.
- Unified all **micro-services** under a single entry point using **Ocelot API Gateway** for centralized routing and management.
- Implemented a structured **logging mechanism** using **Serilog**, enabling effective monitoring and debugging.
- Created **Cosmos DB-based endpoints** for handling audit logs, with ongoing development for enhanced tracking and analytics.
- Implemented MongoDB as a POC and tested its performance using MongoDB queries via a WebAPI.
- Integrated RESTful APIs into the front-end for smooth communication with back-end services.
- Used **Redux-Saga** to manage complex **asynchronous** operations and Jest for unit and integration testing, ensuring code reliability and maintainability.
- Implemented Redis cache (as a POC) to store frequently accessed data and enhanced performance.

eDQR (Electronic Development Quality and Regulatory)

- Developed **RESTful APIs** and integrated databases using **Entity Framework Core** for efficient data access.
- Implemented **JWT-based authentication** and **authorization** to ensure secure API communication.
- Implemented version tracking for every modification in Word documents using IT Hit WebDAV.
- Developed single and multiple Word-to-PDF file conversion using Aspose.Words and Aspose.PDF libraries.
- Focused on **security**, **performance**, and **scalability** across the application architecture.
- Managed application state with **Redux** and implemented routing using **React Router**.
- Consumed APIs with **Axios/Fetch** and built **reusable UI components** using **Material-UI** for a consistent user experience.

Service Now

- Developed **CRUD endpoints** with proper validation and error handling for efficient data operations.
- Ensured data privacy and security using a robust **JWT-based authentication** mechanism.
- Designed and implemented a **responsive UI** with **HTML5, CSS3,** and **JavaScript**, ensuring cross-device compatibility.
- Integrated **real-time APIs into React components**, enhancing interactivity and ensuring accurate, up-to-date data display.

SKILLS

- **Technical Skills:** ASP.Net Core 8, C#, LINQ, Entity Framework Core, React Js, JavaScript (ES6/ES7), TypeScript, Redux toolkit, React-Saga, Material-UI, HTML5, CCS3, RESTful APIs, API Integration, SQL Server 2022, COSMOS NoSQL, JWT Authentication, Performance Optimization.
- **Tools:** Visual Studio, Visual Studio Code, Git, Azure Boards.
- **Operating Systems:** Windows 10.
- **Methodologies:** Agile, SDLC (Software Development Life Cycle).
- **Soft Skills**: Communication, Analytical Problem Solving.

EDUCATION

Bachelor of Engineering **Jun 2016 - Jun 2020**
SCSVMV University

- Specialization in Computer Science.

ADDITIONAL INFORMATION

- **Languages:** English, Telugu
- **Awards/Activities:** Received the "Employee of the Month" for outstanding contributions to project innovation.
